

## Legislation and Compliance Solutions for Workplace Safety

### Work Health and Safety Regulation 2017 stipulates that

A person conducting a business or undertaking at a workplace must ensure that an emergency plan is prepared for the workplace covering:

- Emergency procedures
- Testing of the emergency procedures
- Training of personnel

#### Emergency procedures include:

- An effective response to an emergency, and
- Evacuation procedures, and
- Effective communication to all persons at the workplace

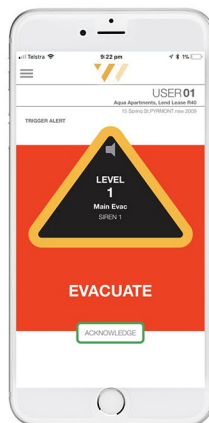

An effective method of response to an emergency may be to activate an Evacuation siren to alert everyone to exit promptly to a safe area in accordance with the evacuation plan.

The Vanguard Wireless Stand-Alone evacuation system consists of a siren and one or more triggers

The system is wireless and can be implemented on location within a matter of minutes

Pushing a trigger activates the siren so that everyone can be alerted and exit safely

Call **Vanguard Wireless** now for a no obligation demonstration of our innovative and cost-effective safety alert solution
